Front engine with direct injection of petrol, rear traction (AWD Opt. With other engines) The design of the Cadillac ATS could be the best still under the latest indications for the brand, as established by the XTS and the next CTS. It is instantaneously fresh, but still combines its older brothers to include the new front white LED border design. These two vertical light blades start from the lower beam and extend through the edge of the headlights for a dramatic night scenery. The LED layout is innovative and extends the visual width of the nose very well. The bumper forms a sharp air dam near the carved corners that extend back and forth from the main group for a sporting look. The country has a remarkably low hood and the elegant ultra short from the main group for a sporting look. The mirrors carry repeaters of the turning signal on the edge of their thin single body mounting stem, aping the high design appeal by Aston Martin, among others. There, in the profile, is also sporty and slinky, with a low roof and a rear design of the turning signal on the edge of their thin single body mounting stem, aping the high design appeal by Aston Martin, among others. There, in the profile, is also sporty and slinky, with a low roof and a rear design of the cabin. seats deep to maintain the space for the legs. The rear view to three quarters and the rear view show the most elegant Cadillac trunk from the 1993 Seville STS. A regular flow of horizontal bends of the body lead into the trunk and lead to a light bar brake with pinched LED that acts as a high speed spoiler. The general shape of the parachute and the slender body emphasize the great and ATS pneumatic packages and its rear traction design. The rear details are formidable: double chrome exhaust finishes that are still some of the the brightest and most dramatic LED designs on the road. 2014 Cadillac ATS~ÂÂ External Dimensions: 2014 Cadillac ATS A¢Â Standard Features External: Headlamps, High Intensity Discharge Includes Adaptive Advanced Lights, stop/brake LED center (CH MSL) 17-inch x-8-inch premium painted aluminum wheels Run-flat, P225/45R17 throughout the fascist season, front and rear body color; Suspensions, swing panel, body color grids, midnight chromed shades grids, aero active (Deleted when the driver assistance package is ordered). Automatic Doors Rainsense Wipers Handle Doors, Lighting 2014 Cadillac ATS Optional External Features: Rear Detector Installed (\$450) Eighteen Inch Forged Aluminum Wheels (\$800) Aluminum Pedal (Dealer-installed) 19-inch Aluminum Wheels with Ultra Brightness Finish (Dealer-installed) 19-gloss aluminum black. wheels (Dealer-installed) 19-pole Y-rated summer tires (De interior of the ATS is pretty amazing, especially compared to other Cadillac and GM models that just approaches this level of finish. Tana or black leather are standard and include either wood or brushed aluminum inlays. The ATS Turbo Performance trim is the tastiest of the group with merlot leather and carbon fiber seats for the day 3,169cor. The Cadillacs Cue Central Touchscreen, but the system needs the navigation option of \$795 to complete. The complete CUE system is standard on all but the lowest trimester to include Bluetooth for audio and phone calls, voice recognition and a better Bose stereo of 10 loudspeakers which is an expensive option on standard ATS models. A big change for the 2014 automatic equipped ATS Turbo Berlin is a new, larger diameter steering wheel with a cut-off magnesium displacement paddle. Other important changes to the interior configuration of 2014 include a frameless rear-view mirror has an electrochromic automatic dimming and is a pure glass mirror up to the edge, against framed in black plastic. ATS look like small general Cadillac standards inside, but it is above or within one inch of all the main internal dimensions of the BMW Series 3, Audi A4 and Mercedes-Benz C-Class. The latest BMW now has two extra inches of legroom but both are still tight for large passengers. There is a warning of a size for the ATS: the trunk is quite small and has only one skipass-through- not a folding back. 2014 Cadillac ATS "Internal dimensions: 2014 Cadillac ATS" Standard internal features: audio system, stereo CD / AM/ FM, double USB ports, SD card slot and Cadillac auxiliary audio port The user experience and surround sound includes an auxiliary device of the Connectivity interface, single CD player of the disk, color information display with touch screen from eight thumbs, Siriusxm radio and HD and BOSE Premium surround Sound 10-Speaker Bluetooth System by phone / audio, phone experience / audio with natural voice recognition; Device connectivity interface; Integrated surfaces in leather antenna antenna antenna antenna antenna antenna antenna antenna antenna; Seat regulators, driver and 8-way passenger front power, more 2-way 2-way 2-way 2-way adjustable 4-way lumbar Plus power; Seats, performance includes (AE8) Content of seat regulators, driver and 8-way passenger front power, more 2-way manual adjustment of the length of the cushion and driver feeding side bolster adjustment Flying, covered in leather; steering wheel controls, audio, telephone and cruise controls, audio, audio, telephone and cruise controls, audio, Mirror, interior without auto-dimming frame 2014 Cadillac ATS « Optional Interior Features: CUE with navigation (\$795) Power roof (\$1.050) Cold Weather Package (\$395) Driver Assist Package ( wheels. This is enough to have 21 extra horses compared to the BMW 320i, but it is a bit shady to an estimate of 7.5 seconds at 60 mph. In the upper part of the range is the 3.6 liters V-6 production 321 horses and 275 pounds-full torque for a 5,4 seconds 0-a-60 mph race. The V-6 significantly increases the ATSâ ¦s braking weight in both rear and AWD configurations, with the heaviest of about 400 kilos more fleshy than the 2.5 litre base sedan. Even so, the AWD V-6 is the fastest ATS makes 272 horses at 5,500 rpm and 260-pounds torque only 1,700 rpm. This is a strong motor with a generous power of passage and sprint in the 3,300-pound saloon. The power supply is channelled through a six-speed manual or six-speed automatic for rear-wheel drive models, and only via the automatic for AWD models. All Turbo ATS are very close in time from 0 to 60 mph, from 5.9 to 6.1 seconds to 60 mph and driven by the automatic AWD. The ATS Turbo saloon top to 149but speed up to 163 mph have been clock by some performance tuners. The turbo engine is mature for further thrust and power and has abundant from the aftermarket. A unique feature of the ATS rear-wheel-drive berlins is a limited mechanical back slip differential (only on rear-wheel drive cars). This ensures a great traction out of the corners without any electronic intervention by the control of stability. It also increases the balance in hard braking and bumps in the middle of the curve. Shots are something that the ATS takes off with the optional FE3 setup (standard on Luxury, Performance and Premium coatings) that offers adjustable magnetic control. As General Motors owned the company that developed (and owns the patent) this technology, Cadillac team has access to advanced versions not yet offered to other manufacturers. The Caddy also benefits from a more intensive development by the inventors of the system. All Cadillac ATS have adjustable driving settings, but MRC equipped cars also have an additional level of control via a Sport button to change steering, accelerator, steering and suspension in maximum attack mode. The wide range of MRC adjustments gives the ATS a softer guide than normal when you do not use one of the sports modes. 2014 Cadillac ATS - Mechanical Details: Security 2013~2015 Cadillac ATS Sedan ATS ATS offers Cadillacâ |s complete Driver Assistance Package as an additional option for \$3,650. This includes adaptive cruise, front collision alarm, security seat and more "all with information displayed on the standard 5.7 inch caliber cluster screen. This leaves the CUE system for audio, climatic and nav and Even the use of these advanced technologies. The ATS is supplied as standard with front and rear ultrasonic parking sensors and a back backup camera. 2014 Cadillac ATS Turbo Turbo Standard Safety Features: LED Daytime Running Lights Air bag, driver and front passenger front (double stage for passenger), knee and side, front and rear curtain Air bag, rear chest for external seating Air bag, OnStar passenger detection system, 1 year Directions and Connections Automatic Crash Response; Stolen Vehicle Assistance; OnStar Turn-by-Turn Navigation Forward Collision Alert (also included when (Y66) Driver Assist Package is ordered) Lane Departure Warning Front Parking Assist, ultrasonic, with audible warning bells Rear Parking Assist, ultrasonic, with audible warning bells Rearview backup camera door locks, rear security child restraint system of the child seat; LATCH System (Lower Anchors and Top tethers for CHildren), for Child Safety Seats Emergency Release Handle Trunk Tire Pressure Monitoring System StabiliTrak, vehicle stability enhancement systemPricing The ATS is valued at \$33,990 for 2013, with an increase of less than \$500 expected for 2014. The prices below are for 2013 models, which currently also offer a \$2,000 refund from the manufacturer. Competition BMW 328i The BMW 3 Series is obviously the top dog in the sports sedan segment and expands the range with a new 320i base model that produces 180 horsepower at a base price of \$33,000. The most direct comparison with the ATS is the \$36,000 BMW 328i which is also available with rear or AWD. The biggest difference between the two cars is the superior motorway economy of the BMW and the eight-speed automatic transmission (compared to the 6-speed Caddy). Audi A4 The Audi A4 also has a price tag right at the top of the ATS, but the \$34,000 basic front-drive uses a CVT automatic transmission that can work with a strong accelerator. The Ouattro AWD A4 is available with both a six-speed manual from about Dollars up. The A4 is much less than a dedicated sports sedan with a standard sedata driving quality, but also an older external style and less internal technology than BMW or Cadillac. ATS is a car that some believed was beyond Cadillac. ATS is a car that some believed was beyond Cadillac. ATS is a car that some believed was beyond Cadillac. the perfect sports sedan. A 6-second 60 mph sprint plus 32 mpg highway are not stats that have ever come from Cadillac before. The interior offers excellent levels of fit and finish that are matched only with the latest Corvette Stingray for perceived quality. Of course, some of the finishes are questionable, but even the faux wood has some elegant bending which, in fact, resemble trees. Yes, there's a lot of chrome trim in the cab which would normally be aluminum alloy in an Audi. These demerits are not scammers when they come with places as big as standard. They are sportly, supportive and enormously adjustable in distinctly German ways. The difference is that even the ATS base corresponds to the best 335i optional sports seats for the range of motion and long-distance comfort. This theme takes place elsewhere when comparing the ATS with the Series 3. In the sales volume chase, the BMW 3 Series Base is truly a ghost of its former self and comes with an extremely stripped down cab in basic finishes. It's still the benchmark for the segment, but it just gets really luxurious at \$45,000-plus prices. The ATS comfortably surpasses the low-end BMW 320i and 328i models in a package that is generally about \$8,000 cheaper (including options). For the first time in history, the 3 Series' predefined place in the sports sedan world is under siege from Cadillac. The ATS makes no excuse for its American appearance â and finally its buyers won't need an apology for performance. The proportions and exterior details are perfect Lightweight and agile with rear engine and turbo Finally, some good quality skins and fiber of For the interior of the Performance ATS leave Trunk Ãf Very small and the rear seat does not fold Run-Flat Run-flat tires be expensive to replace (but protect the wheels from holes) Sale value of Cadillac sedan is not great against BMW BMW
