Adult Swimâs anticipated adaptation of Uzumaki's anime, the acclaimed sleeve of the master of terror Junji Ito, has resurrected with a brief teaser and a release date: October 2022. Originally announced in 2019 for launch in 2020, Uzumaki's production was one of many disrupted by the COVID-19 pandemic. In a new update, the director Hiroshi Nagahama offers more explanations, saying that the four-stage miniserie is a larger production than usual, apparently due to its black and white animation style that pretends to reflect the black and white ink style of Itoâ s s foul in a disconcerting degree. Nagahama also offered a brief introduction of the series in motion, although totally devoid of context or fear. Those who want to see more will have to sit down, as Nagahama says he intends to share more as the launch date is approaching, but since more than a year is missing, we could be waiting for a good time for our first real look at how Uzumaki is. That is, however, time to read the sleeve or see the live adaptation of 2000 if you feel unpleasant. Growing up in the 1990s was an explosion for the fans of terror in deer. The chicken skin gave us stories of principle terrifying R.L. Stine, and Tales From The Crypt had a series of HBO televisions to sneak into. As I grew up, I found myself looking for horror literature instead of horror movies, but thanks to the Junji Collection Ito found creepy stories for the fanatics of terror. A content warning: this series includes bloody and supernatural horror. Junji Ito Collection is not recommended for the younger audience. Even if you see Chucky or IT on Halloween,Junji Ito is already a prestigious name among manga fans due to his career writing macabre series of sleeves like Gyo,and an adaptation sleeve of Mary Shelley's Frankenstein. This series of anime aims to animate some of the shortest stories of Itoâ s. These stories go from three minutes to 22 minutes from the 25-minute episodes.He took every three minutes to see. Perfect for fans of the horror stories of the phrase ". Many creators of horrors tend to get into a subgender of niche horror. In the collection there are stories that cross multiple aspects of horror, and there is something to petrify everyone. For example, people who have tripophobia (a reaction of fear / disgust to bumps or irregular holes in the skin) will get the chicken skin of the episode. Arm bathed with holes. The slippery girl has a theme of covetous with which they become familiar. Children are known to have trouble knowing how much to talk, so some parents warn children that the vine children or insects crawl out of the mouth if they talk too much! Turns out it's too much talker means you've come out of a slug. Your mouth. Yuuko ends with a worse destination! The teen Saiko is tired of finding the molfoles in her bedroom, so she decides to move with her aunt. This story brought new fear of breeding helicopter children. However, Saiko is surprised to see that she is not only her aunt who allows the molzones, but he has also renounced any privacy appearance. "So, I thought, why not overload all social media platforms?" Saiko tries to flee the city until she sees what her neighbors have become behind the troubles. There are some continuous vineyards in the series that follow the recurring characters. The most obvious is Souichi, a fifth grade student who is expert in curses and hexes. We all knew that a child who liked to do strange things like chewing iron nails or putting staples on his skin. Some of us were that a child.souichi appears three times in the series to cause havoc in his classmates and teachers. He fortunately fails in his larger plans before becoming a megalomaniac. With a dark forest, Souichi,a voodine mule to a To cause bowel pain to one of your classmates. A stranger removes the doll to stop the curse. As a bully, Souichi has surely had fun terrorizing his older sister, but he is also scared of spiders. Soouichi's curses are a little more frightening when he creates life-size fabric masters to take care of His frustrating human masters. In the last main episode, Souichi tries to manipulate his class into believing rumors about him in an attempt to become more popular. His class realizes that Souichi has been lying, so he seems to shut up again. A few days later, a strange ad appears in the class Blackboard.girls in the class Listen to rumors about the ethereal model. For cosmetic reasons, he goes to the swamp and bathes in the mud. One of the sixth grade girls believes the rumors and tries to bathe in the Mud.instead swamp, Souichi was trying to lure the girls to take pictures of them. Ellouichi gets a horrible conclusion when she realizes that some of her rumors are actually some of her rumors. REAL ... While each episode has only two stories, each story has a way of hooking you to see what happens. Junji Ito's drawing style also helps to contrast the beautiful against the grotesque. This series has only one season with 14 episodes, but luckily Junji Ito will come out with a 4-part Uzumaki miniseries next year in Swimming for Adults! The Junji Ito collection is ideal for fans of Stephen King, Black Mirror, Trick ~ R TRATE, THE TWILIGHT ZONE, Creepshow and Crypt Tales. With the short stories and the chills of ants against the spine, this show is perfect for dancing on Halloween (or any time you need a scare)! VRV and funimation Stream Junji Ito.
