Check the wave module of the oximeTry module Memory aboard Smart Ramp Encore Patient Management System SD card and cable, wireless and broadband modem. C-Flex Plus, A-FLEX: Resistance Control: Humidity Control: Heated Tubing: Pressure Range - 4 cm MIN 20cm Maximum ramp time - 0-45 minutes Patient Adjustable Start ramp Pressure Pressure - Adjustable patient filters - Optional Ultra-Fix (Disposable) Device Settings: Screen and Control Control Control -MIN Data Storage CapacityCompliance, there, leaks, pressure storage content of 2 days and 30 days: there, medium pressure, grass k putting compliance - compensation of altitude of breathing detection - - Electrical requirements - 100 - 240 VAC, 50/60 Hz (A adapter will be required to connect the CPAP to a wall outlet out of the U.S. Humidifier. - Heated with humidity control that detects environmental humidity in the DC Power room - DC DC cable developing but not yet released AC Power - This system works automatically between 110v and 240v AC. Real weight - 3 pounds 1.36kg Dimensions - 7x L x 5.5x W x 4x H, 18 cm L x 14 cm W x 10 cm H CONTAINE OF BOX System One REMStar Auto CPAP Machine System One REMStar Feeding and Cord Travel Carrying Case SD Memory Card Reusable foam filter (2) Patient Manual Circuit Mask: comfort nasal gel m@sk (based on the selection of the variant) Additional information This auto machine CPAP is the newest platform called the Remstar 60 series. There is PAP auto technology using a sophisticated algorithm. is controlled from the machine to the mask. This relieves the rain and makes the night of sleep much more comfortable. The REMstar Auto A-Flex is a CPAP (Continuous Positive Airway Pressure) device designed for the treatment of obstructive sleep apnea (AOS). It can provide CPAP or self-CPAP therapy. When prescribed, the device offers several special features to help you make your therapy more comfortable. The ramp function allows you to reduce the pressure when trying to get some sleep. Atmospheric pressure gradually increases until the pressure of your recipe is reached. You also have the option not to use the ramp function at all. The System One device has a temperature sensor at the end of the heated tube to provide the selected humidity level to the patient while protecting against the rain. As a result, higher humidity levels can be achieved for patients who can benefit from humidification. The CPAP-Check mode checks the user every 30 hours to determineThe therapeal pressure is optimal. If it is not optimal, automatically adjust the fixed pressure of CPAP in 1 cm H2O to get an ideal pressure. Designed around your needs, Philips Respironics took information from home care providers and developed a device to meet the demands of an evolving dream industry. As an extension of the proven System One family, the REMstar complements the System One line by providing a robust set of features in an affordable unit. Now, most of your patients can enjoy many of the same comfort benefits, including: A& Better humidificationSimplicity to the maxSystem One REMstar offers users simplicity and ease of use through its intuitive icon-based interface. Philips Respironics saves costs for home care providers by offering a family of devices with common components such as oils, tubes, humidity and more.A more natural way to breatheFlex technology helps make PAP therapy more natural by detecting when the patient is exhaling and reducing pressure at those times so that breathing is more natural and comfortable.Excellent reliability without water ingressThrough a combination of Phillip Respironics' smart-designed water chamber, in addition to the advanced "dry box", the risk of water entering the device is virtually eliminated.A tilted water chamber can be tilted and even turned upside down without filtering back into the device. If any water escapes from the chamber, the dry box prevents it from entering the device.Includes A-Flex Pressure Relief TechnologyA-Flex is designed to work with our clinically proven CPAP automatic algorithm to further enhance comfort by matching the pressure delivery with the patient's entire respiratory cycle. Like C-Flex, A-Flex provides pressure relief based on the flow at the beginning of exhalation. Like Bi-Flex, A-Flex softens the Inhalation pressure to exhalation to provide additional comfort in an auto-CPAP mode. The pressure profile reflects the patient's breathing, and with the intelligence of the automatic algorithm, it will respond to the patient.Need throughout the dream session. For you, the addition of A-Flex for Flex Family of Pressure Relief Technologies by Phillip Respironics means that each patient can enjoy a more comfortable and effective therapy. In fact, you can never treat regular pressure therapy again. PESPOSITIONS CARDS: - H20Flex pressure relief from 4 to 20 cm: - 0 to 3Remp. Time: - 0 to 45 min (increments of 5 minutes) Highly integrated Hmwrite - Highly integrated Hmw/Lmdrite sensor - Highly integrated Hmw/Lmdrite - 3lbs; 1.36 kg (without humidy er) Filters: - Optional foam and configuration Ultra-Nedevice Configuration: - LED / Keypadcapacity Storage: - Compliance 7-30-Day
