There are the following steps to be followed while reading the NCERT textbook efficiently for any UPSC exam. Before starting to read, let us prepare ourselves: Before starting to read, take a stopwatch and record the time required to read one page of a particular NCERT textbook properly. Then see the number of pages that are present in that textbook and multiply that number by the time required for reading one page. Calculating will give you a time frame of exactly how much time you require to read one textbook thoroughly. Since now you know how much time is required to read one book we can start reading. 1st Reading: Whenever you start reading any book, keep a highlighter marker, pen, and rough copy readily available near you. Once you start reading, keep marking all the new words or topics that you come across. As soon as you come across any new topic, try to find out the meaning and concept behind it immediately and start keeping a note of it. 2nd Reading: 2nd reading should be done within a gap of 2-3 days maximum. When you start your second reading, try to recollect the concepts that you had studied earlier and seen how much you can remember correctly. Based on that, you should determine the intensity of your second reading. While doing the second reading again, try to mark essential topics that you may have missed in the previous reading. This reading will help you become familiar with all the chapters in the book. 3rd Reading: This time you do not have to go into full details about the topic; hence this reading will not take much time. Try to do this within a 2-3 days gap. In this reading brush up on all the essential topics that you have marked in your earlier readings. Testing Yourselfs: Now since you are familiar with the textbook, you can start solving questions from all the chapters present in your textbook and try to find out which topics you are lagging on and resolve the issue. NCERT textbooks are the Bible for appearing for the NEET exam. NCERT books can solve 70% of your problem of where to study. If you study the NCERT textbook for biology thoroughly, then it is sufficient for you to score 300 \*(Only if you revise more than three times)\*. However, for NEET, NCERT is sufficient only for Biology, except that for other subjects like Physics and chemistry you need to follow some different books apart from the NCERT textbooks. Also, make a note of the essential topics. Doing so will help at the time of revision of the exam. For AIIMS the syllabus is quite tricky than NEET or AIPMT because the standard is much higher for AIIMS since the motive of the exam is to reject more people than to select. The number of candidates that appear for this exam is vast, so the medical council tries to keep the paper on the problematic side. NCERT provides the basics as well as deep concepts, but one can never be confident and say that questions will be asked from NCERT textbooks only. So it is always advisable to follow other reference books to keep up with the standard of the examination. Is NCERT Enough for Class 10 Boards? Ans. Yes, it is of utmost importance to solve the questions given at the back of each chapter of all NCERT books. The questions given at the back of each chapter not only helps the students to get to know about their understanding level, but it also helps the students to know which is the most important topic from an examination point of view so that the candidates can prepare accordingly.
