Fios tv guide channel

By Darrin Meyer FiOS, offered by Verizon in selected areas, is the subscription television service through which TV signals and other digital services are delivered to the home through fiber-optic cables, providing higher-quality video compared to standard cable. The channels and features available with FiOS rival those of the major cable and satellite TV providers, and among those features is the ability to access recorded FiOS programming from TVs in different rooms without adding additional DVRs, provided you have the proper equipment. Contact a Verizon FiOS representative to request the Home Media DVR, which is the receiver box required for multi-room viewing, as well as additional non-DVR set-top box(es) for each TV you wish to connect. An additional fee will apply for the equipment and corresponding service. Connect the Home Media DVR to the coaxial outlet in the wall and to the TV you use for the majority of your viewing, using HDMI or component video cables if the TV has HD capability. Connect a coaxial cable from the wall outlet to the coaxial input of the receiver box(es) in each additional viewing room. The information is passed back and forth between boxes through the coaxial cables in the household allowing the additional boxes to access the Home Media DVR, with no cables directly connecting the various boxes. Connect the additional box(es) to the other TV(s) in your home using cables supported by that TV (HDMI, component, coaxial or composite). Record programs in the main viewing room with the Home Media DVR and press the "DVR" button on the remote control with that or any of the other set-top boxes to access the recorded programs. There are many TV providers available on the market. It can be difficult choosing the best service. Verizon provides a TV service known as Verizon Fios. The company uses fiber optics for its TV service and claims its performance surpasses that of its competitors. But if a provider's service doesn't meet your expectations, you'll want to cancel. Call 888-553-1555 and enter the phone number associated with your account or your account number. Tell the customer service representative you would like to cancel your Fios TV service. Pay an early termination fee if you are still under contract. If you are not under contract, you are not obligated to pay a fee. Return any equipment provided by Verizon. If not, it will charge you for the equipment. The company will send a mailing label along with instructions. By Steven Hill Of the TV services available in your area, you've narrowed your choices to two offerings from Verizon. Both its FiOS TV and DirecTV services sound good to you. In choosing the right plan for you, you'll need to see what each individual package in each service offers, what the prices are and decide what matches what you both want and can afford. The FiOS TV service offered by Verizon comes in three different packages. At \$65 per month, the Prime HD Plan is the cheapest of them as of 2011. It offers you over 195 channels. The Extreme HD Plan costs \$75 and provides more than 285 channels. For \$90, subscribers can choose the Ultimate HD Plan. This final plan offers more than 350 channels. All three FiOS packages comes with free premium installation. If ordered online, the activation fee is waived. Verizon also offers its DirecTV service. DirecTV comes in one of four packages. The first is Choice Xtra. This package provides over 210 channels for \$38 per month. Choice Xtra + DVR is the second package, offering the same channels as the first but with an included digital video recorder. It costs \$45. Choice Ultimate + HD + DVR offers more than 225 channels, including 50 HD channels and a DVR for \$65. Premier is the final available package. This offers all of the channels from the Ultimate package in addition to all available premium movie channel for \$86. In terms of channels available and price, FiOS and DirecTV differ. For example, the cheapest FiOS package offers 195 channels while the cheapest DirecTV package offers 210. The DirecTV plan is also \$27 cheaper. However, the FiOS package offers more HD content, as well as bonuses like free installation. All FiOS plans comes with a DVR unit, where a DVR is offered with three out of four DirecTV plans. DirecTV may also be unavailable to you if, for instance, your home doesn't have a clear view of the southern sky. Choosing the TV service that's right for you depends on different factors. If you want the most available HD content, consider FiOS. If money is an issue, then DirecTV offers several packages cheaper than FiOS's cheapest available plan. If you live in an apartment building or house without a good view of the southern sky, then your choice might be physically limited to FiOS. Make the choice based on your budget, the channel package that sounds good to you, and your home's physical setting. By Darrin Meyer FiOS is the digital television and high-speed Internet service offered by Verizon that uses fiber-optic cable to provide hundreds of digital and high-definition TV channels, with an optional Digital Video Recorder (DVR) to watch shows when you choose, as well as download movies to view on demand. Finding and selecting movies to download is a simple process that lets you enjoy a wide range of movies without leaving your home. The fastest way to download movies is to go through the On Demand feature. Press the On Demand button on the remote, or go to channel 900 to bring the menu up on the TV screen. Use the arrow keys to browse through the various categories, including "Featured," "Browse All," or "Recently Viewed." The right half of the screen has a number of sub-categories and genres to help narrow the search. Choose the "High Definition" folder if you want to see which movies are available in HD. Make your selection. If the movie you choose is free, simply click on "Watch Now." If the movie has a pay-per-view charge, when you click "Watch Now," it will show the price and ask if you wish to purchase. If so, click on "Purchase Now." The movie will begin shortly once it downloads to your system. Another way to choose a movie to download is through the Search feature. There are two ways to access this: one is through the folder that says "Search" in the left side of the On Demand menu. Yet another is to press the "Menu" button on the remote control to bring up the main menu, then move to the option that says "Search," and press "OK." Move the cursor to "Search by Keyword" and press "OK." You'll see an alphanumeric grid on the left side. Use the arrows on your remote to enter letters or numbers. This will bring up matching titles on the right side of the screen. Options are matched by title or relevancy of the keyword. To choose a selection, move the cursor to highlight the title on the right and press "OK," and then press it again where it says "Watch Now." Again, if there is a pay-ver-view charge involved, it will be noted on the screen. Press "Watch Now," and wait for the selection to load shortly. SiriusXM satellite radio features well more than 200 radio channels of music, talk, sports, news, comedy and more. With so many SiriusXM radio channels, it can be hard to know where to start listening. Here's a look at the SiriusXM channel lineup to allow you to get some ideas. One major component of the SiriusXM channel lineup is its suite of commercial-free music channels. First off, check out some of the pop variety in the early channels. You'll find plenty of fun looking through the various decades that SiriusXM has paired up with particular channel numbers. For instance, you'll find "50s on 5," "60s on 6," "70s on 7" and so on up through time. Next, you'll find a wide variety of rock channels spanning decades and style, including one for Elvis Presley, along with country music in multiple sub-genres. With many other music genres and styles included, there's bound to be something for everyone. Ready to talk sports or listen to others talk about sports? How about live play-by-play action? SiriusXM offers multiple sports talk channels as well as lots of dedicated golf, basketball, baseball, football, NASCAR and college sports. Keep in mind that your exact channel lineup may vary depending on your SiriusXM subscription. What would radio be without news and talk? SiriusXM offers a strong lineup of both with business, news and political talk from different viewpoints as well as news channels from CNN, Fox, MSNBC and more. One interesting category of the SiriusXM channel lineup is a one called simply "More." Under the More heading, you'll find channels like RadioClassics, which plays old-time radio shows from the format's glory days, Rural Radio, for the "agriculture/Western lifestyle" and several Canadian channels, among many others. SiriusXM also offers traffic and weather updates for several major United States cities, including New York, Boston, Philadelphia, Washington, D.C., Chicago, Detroit, Dallas-Fort Worth and Los Angeles. Be aware that there are several different SiriusXM subscription packages, including Internet streaming packages, and not all channels may be available across all subscription types. Also, remember that there are far more channels available than those we touched on here — so grab your SiriusXM satellite radio and see what you can find.One additional point is that you won't be able to tune into SiriusXM satellite radio channels on a traditional AM/FM radio. AM/FM radios are intended to tune-in over-the-air broadcasts from traditional terrestrial radio sources. SiriusXM utilizes a different type of antenna and radio to receive the satellite signal that they broadcast with. To listen to these channels, you'll need a specific SiriusXM radio, antenna and subscription — or possibly a streaming subscription. Cable TV has been the warm comfort visual medium for Americans for over 20 years. Cable TV is made available to customers via a cable box that hooks up to a television set and provides a number of channels depending on the cable TV package chosen. Most of the major industry providers today offer more than just cable TV packages. More frequently, these media companies provide phone services, Internet service, cable TV, or a bundle of all of these services. Comcast Cable TV Service Comcast currently offers (winter 2019) the following three cable TV packages under its InfinityX brand: BASIC CABLE (\$20/mo) -This basic cable package gives customers these basic channels below in this package, along with local cable access, government, and educational channels. ABC BYUtv CBS CNBC C-SPAN C-SPAN 2 CW Discovery EVINE Live FOX Galavision History HSN HSN2 INSP Jewelry TV NBC PBS QVC Travel Channel TV Land EXTRA CABLE (\$60/mo) - This next cable channel package offers the main network channels and more than 125 cable channels, including ESPN, C-SPAN, and others. PREFERRED CABLE (\$80/mo) - Comcast's premium cable TV package is Preferred Cable, which offers the main network channels and more than 200 other cable channels, including niche interest channels like Food Network, Radio, for the "agriculture/Western lifestyle" and several Canadian channels, among many others. SiriusXM also offers traffic and weather updates for several major United States cities, including New York, Boston, Philadelphia, Washington, D.C., Chicago, Detroit, Dallas-Fort Worth and Los Angeles. Be aware that there are several different SiriusXM subscription packages, including Internet streaming packages, and not all channels may be available across all subscription types. Also, remember that there are far more channels available than those we touched on here — so grab your SiriusXM satellite radio and see what you can find.One additional point is that you won't be able to tune into SiriusXM satellite radio channels on a traditional AM/FM radio. Be aware that there are several different SiriusXM subscription packages, including Internet streaming packages, and not all channels may be available across all subscription types. Also, remember that there are far more channels available than those we touched on here — so grab your SiriusXM satellite radio and see what you can find. One additional point is that you won't be able to tune into stream Xfinity titles onto a range of personal electronic devices. These bundled packages vary in price across the US, but here are the general details for the Chicago, IL market: Digital Starter TV DIGITAL STARTER TV: \$60/mo. for 1 year. Includes over 125 digital channels, such as The History Channel, Fox Sports, and MSBNC. This package also has the Xfinity on Demand service (movies/TV titles on demand) and Xfinity Streaming access on TV, phone, laptop, or tablet. X1 Starter Pro Double Play X1 STARTER PRO DOUBLE PLAY: \$75/mo. for the first 24 months of a 2 yr. agreement. Includes more than 125 digital channels, and Internet access with speeds up to 500 mbps. Plus, free access to millions of wifi hotspots. X1 Preferred Triple Play X1 PREFERRED TRIPLE PLAY: \$110/mo. for the first 24 months of a 2 yr. agreement. Online orders only. This package includes unlimited nationwide talk and text, more than 200 digital channels, and Internet access with speeds up to 500 mbps. Plus, free access to millions of wifi hotspots. Comcast Growth Cable companies have been faced with declining home cable TV subscriptions in recent years. Because of this, traditional cable TV operators have had to advance forward with mergers, acquisitions, or launching new streaming services, or risk being left behind. The recent growth in streaming companies like Netflix, Hulu, Disney+ and others helped motivate Comcast to purchase the UK's SKY TV for \$40 billion in 2018. In the deal, Comcast gains more subscribers, more content and more international reach. (Image credit: Roku) Forget Chip and Joanna. I want Kevin, Richard, Tom, Kevin and Jenn. And I'm about to get a lot more of them. That's because Roku announced that it acquired the rights to the entire This Old House catalog — some 1,500+ episodes — and will make them available to stream for free on the Roku Channel.Flip or Flop and Love it or List It will come and go, but This Old House has endured for more than 40 years, setting the standard that every HGTV show has yet to reach. It's no wonder that This Old House and Ask This Old House outperformed every other home improvement show last year, according to Nielsen data.I fashion myself as a DIYer, and over the years have learned dozens of home-improvement tips by watching This Old House as well as the more recent Ask This Old House. From replacing light switches to changing faucets to patching drywall, the lessons I learned watching this show have easily saved me hundreds — if not thousands — of dollars I would have had to pay electricians, plumbers, or contractors. If you've been following Kate Kozuch's DIY smart home series (you should) and have questions about neutral wires, I highly recommend watching This Old House to learn more about your home and how to fix it. Because Roku's deal includes the entire back catalog of This Old House, that means I can go back in time and watch the original episodes with Bob Vila and Norm Abram. (Note to Roku: please pick up New Yankee Workshop, too.) It's interesting to see how home improvement technology has changed in the 42 years the show has been on the air. I wonder what they would have thought about PEX tubing and composite lumber back in 1980.The good news is that the Roku Channel is available on just about every other streaming platform,During the pandemic, it's no surprise that there was a boom in home improvement, as people couldn't go anywhere, and instead looked to renovate that bathroom or patio. While it looks like we'll be emerging from lockdown at some point, fixing up your house will never get old.Roku makes the best streaming device, but the good news is that the Roku Channel is available on just about every other streaming platform, including the Amazon Fire TV Stick and the Apple TV. You can also download the This Old House app on Roku, Apple TV, and the Fire TV stick, but Roku's acquisition means I can get to the shows even faster.I'll still continue to watch and DVR This Old House through my local PBS station, but if you want to get your fix of power tools and Boston accents, there's no better place than Roku. Check out the best Roku VPN to access more content anywhereRead next: Amazon Fire TV's new remote copies the worst thing from Roku
