The problem looks to be related to the send of big requests, which has PDF documents, other SOAP minor requests for the same job, do not show any errors. We identified in the access_log of the jboss server that the requests that are showing failure are returning the status HTTP 502 to the requester: "Time Taken: 2 2466000 200.142.2.254 - - [30/May/2019:17:07:13 -0300] "POST /application/wsresource/page HTTP/1.1" 502 7698 "-" "PHP-SOAP/\BeSimple\SoapClient" "-" 634380 8029" So far, after correlating the logs, we noticed that this failure may be associated with a "Connection reset" failure in the log at JBoss: 2019-05-30 17:07:13,785 INFO [com.example.serviceWSImpl] (http-10.0.0.1:9090-101) PAGE: generating PDF 2019-05-30 17:07:15,908 ERROR [com.example.utils] (http-10.0.0.1:9090-101) There was an error converting InputStream to Bytes : null: ClientAbortException: java.net.SocketException: Connection reset at org.apache.catalina.connector.InputStream.read(SocketInputStream.java:210) [rt.jar:1.8.0_181] at java.net.SocketInputStream.read(SocketInputStream.java:141) [rt.jar:1.8.0_181]" Red Hat JBoss Enterprise Application Platform (EAP)
