Photo Courtesy: Jasper Cole/Getty Images Calendars are an essential tool when you need to stay organized. They help keep track of simple but vital dates, such as upcoming birthdays and anniversaries, but if you lead a hectic life, their usefulness goes far beyond keeping up with the days of the week. In the right hands, calendars become elaborate planning tools that help you organize everything from daily work meetings to your children's medical appointments to extracurricular activities. Usually you can find free calendars at local banks, grocery stores and other small businesses (who often use them as promotional tools), but they are typically small with squares too small to be very useful for anything besides the simplest tasks. Fortunately, you can find a lot of useful and interesting calendar templates online in numerous styles to help with organizing a number of activities. In fact, with so many options to choose from, you can decide that you want a custom calendar in every room of your home. Any shop with office and school supplies certainly has a wide selection of gorgeous wall calendars and book-style designers, but the price of these items can be ridiculously high. Instead of letting your wallet take a hit, you can create your calendars using templates with both basic styles and visually stunning. Options range from creative abstract designs to colorful flowers and classic plaids. Photo Courtesy: BotanicalPaperWorks.com The offers of Botanical Paper Works are about the easiest to work with as you can get. More ready-to-use printers than current models, calendars are not customizable at all, options always look stylish and professional. Exact drawings can Every year, although you can always count on at least an ecological theme design in the collection. The style of the page to be colored is also a recurring choice that makes a great calendar for child monitoring. children. The Cottage Market Freebie Gallery also has links to printable calendars and daily planners, including a lovely Harry Potter set for wizard fans. Despite all the visual charm of a really cool calendar, sometimes all you need is a simple style on which to write notes and keep them in the car or on your desk. Usually it is easy to find sites with good templates for basic calendars. If you want a wall calendar that focuses on large writing spaces instead of colored drawings, Print-a-Calendar could be the answer. This extremely simple website allows you to easily print simple monthly calendars, but it offers a great advantage to balance the boring aspect. You can enter your calendar (if you already know it) directly into the daily boxes on the website before printing, eliminating the need to worry about the size of your writing. Photo Courtesy: Microsoft.com You can't miss the selection of basic, free and easy-to-use models available on the Microsoft website. Styles are available for use in Word, Excel and PowerPoint. Microsoft also offers its Office 365 users access to premium models with elegant, colorful designs that look bright, professional. You will need to access your Microsoft account to access premium options. If your life is too chaotic and crowded, you may need the most extensive features of a day planner instead of a wall-to-wall calendar model. It is a little harder to find planning options that you can create and print for free, but it is not impossible. Template Lab offers a good selection of daily layouts to adapt to a variety of activities. You can print out dating slots for every hour of the day, pages with lesson programs and daily goals and lists of things to do. Most styles exclude date specifications to ensure that models are never obsolete. The site also has an impressive selection of calendar models and life planning tools. Photo: TemplateLab.com TemplateLab.com a calendar that you love but your printer is not up to the challenge, you can always contact an office supply store for professional press. How much you have to pay will depend on the options you choose. Also, if you decide to keep all the pages of your daily program instead of throwing them away while using them, you can take your pages inside for basic binding at a nominal cost. Photo Courtesy: Alistair

Berg/DigitalVision/Getty Images Once you have selected the desired calendar style, it is time to think about how to print and display it. If you are only interested in basic features and choose a simple calendar print to insert into the console of your car, then you do not need anything special for printing. Any standard ink jet printer can produce exactly what you need on white paper per copy. If you choose a style to keep on your desk, you may also be content with a standard print on white paper, but fantasy styles may deserve some fantasy printing. Photo Courtesy: Sydney Bourne/Culture/Getty Images A fitting example: if you create an elaborate and colorful design worthy of a privileged position on your wall, then you should think twice before smothering it with a simple paper print. The bright colors simply will not appear vibrating on the printer's base paper. An ink-jet printer, in particular a photographic printer, should be up to the challenge of producing high quality results if you choose the right paper. If you are going to write on the calendar, choose a brilliant, high quality white paper just below the quality of the photos. If it's just a nice wall calendar, you can really make it shine by printing it on glossy paper or photographic paper. To hang your calendar on the wall, you can use nice pins or pins or a reusable mounting putty if you want to avoid making a hole in the wall. If you think the calendar needs a little extra pizzazz, lock the pages on a nice notebook and hang the notes on the wall or put page inside an attractive and easy to open frame (because © you must change it every month). If you are smart and creative, use a hole to make two holes in the top of each page and then insert a tape or a raffia through the holes, tie the ends on the back and hang it on the wall. The only true limit for use is your imagination. Imagination.
