With its light and sound nasting, and its increase in the presence accurately modified. The SM57 is ideal for live sound reinforcement, for recordings and has an extremely effective cardioid pickup pattern which is the main sound source in a background noise when minimized. In the studio, it is excellent for recording drums, guitar and woodwind instruments. For musical instruments or vocals, the SM57 is a consistent choice of professional intacts. It 'also the standard microphone used on the podium of the US President. UU for more than 30 years. Its outstanding performance, legendary reliability, and diversity of application make this battle caballom choosing intact, producers and technicians from around the world sound. Available Shure SM57 is a cardioid hat Micra Dina, very durable and pays Á © til, perfect for capturing any instrument on stage and in the study.The SM57 is the Micra | The phone is switched on industry MC.SICA. This legendary model offers the high quality captacing | any instrument, both EIA' Á¼tric or bass guitar, drums, wind instruments or cables, and even voice with a Patra |. Cardioid Very effective, the SM57 is Á ± SLA The source of the sound to catch, minimizing external sources, A' Á¼Á¼Á¼ made it ideal for live catches on stage or for recording sessions with the absorption system impacts tires it helps to reduce noise handling the Micra |. phone, minimizing the presence of natural vibration in a scenario. the SM57 sound is clear, extremely nÁ © Á ±, with an outline and a huge presence defined and fidelity that does not interfere with the quality of the mixture, providing a different and defined the original signal. The frequency range is from 40 Hz to 15,000 Hz, which means it captures the perfection with great presence instruments in the lower ranges, such as low, up to instruments in ranges Á MA © s high, like violins and guitars Ela. TRICROS. © Since the SM57 is tolerant of a huge sound pressure, we can argue against the cone of an amplifier or goal to a box without the original sound distortion, even at volc. mels. It is for recordings or Live on a scenario full of instruments, the SM57 is the Micra | Telephone that is part of the team of all sound technicians. Á micra | Telephone is in the Milder sector and is widely used in any place nambiÁ' chi is a very resistant micra hat thanks to its sa |. Construct ... | N, and is able to survive mistreatment and living life on the road, with tá' á¼cinic using the same micra |. phone during dá' Á¼fatas and assured that aÁs.n preserved all its original sound features the SM57 is a legendary micrá ¥ phone that lives with the great stars of the Mc.Sica, but its affordable price puts it within reach by hand, being a micra | Perfect phone for home studios, for versatility and capacity to isolate the instrument and not record. . Background sounds If you are considered a micra | Telephone suitable for capture of instruments, its response LÁ © Na Frequency allows to be used to capture the voice, both singers or announcers to a hearing: SM57 was the microvene of the United States Presidents since 1965. Yes Treats of sound engineers, curtains, manufacturers or MAš.ics, no material list is complete without having at least one SM57 in the collection. Frequency response: 40 Hz - 15 kHz Package content: Micra | Fone, adapter, click on the image to enlarge Ref: S SM57LCE Finantiale Add to wish-list The legendary SM57 is a very versatile dynamic cardioid microphone and a real standard. The SM57 is ideal for both registration and direct. Used in all kinds, perhaps the most micro used in the world with shure warranty continuous reading dynamic type of wiring not included application tools acceptable authorization terminal inclusive observations included cardioid pollar model frequency response 40 Hz - 15 kHz weight 0.284 kg sensitivity -54.5 DBV / PA / 1.88 mV / P Click here to see all features Attention: Last items in stock!
